Project Overview

KRP Transports is a full-stack logistics management platform designed for efficient transportation and fleet operations. The project combines a public-facing website with service discovery, a client portal for booking and tracking, a driver and training management system, and an internal admin dashboard for handling operations, attendance, and document renewals.

Key Features

- Public website for logistics service discovery, contact, careers, and company information
- Client portal for booking transport services, tracking shipments, and managing requests
- Driver and training management system for handling driver records, attendance, and performance
- Admin dashboard for approvals, analytics, fleet management, and operational control
- Backend APIs for authentication, driver management, attendance tracking, document renewals, notifications, and admin workflows

Technology Stack

- Frontend: HTML, CSS, JavaScript
- Backend: Node.js, Express.js
- Database and Data Layer: MongoDB, Mongoose
- Supporting Services: Node mailer (for email/OTP), REST APIs, dotenv for environment configuration

Additional Revenue-Generation Documents

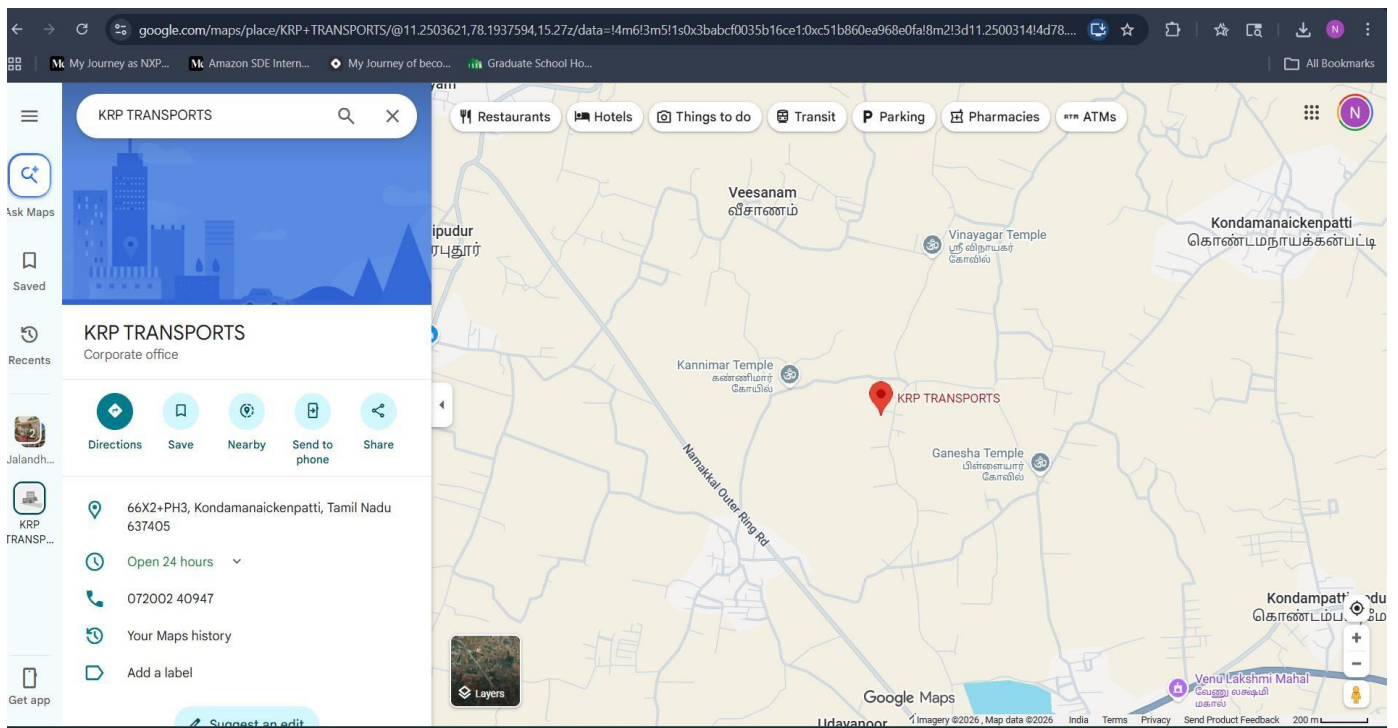

The following documents are required only for revenue-generation projects:

- **Client format**

https://drive.google.com/file/d/1t2AOVuhFT0HJYVbkPRd4VwhchjeF_0K9/view?usp=sharing

- **GST or PAN screenshot/document**

- **Email acknowledgement from client screenshot**

Organization location proof screenshot (Google Maps)
